

VYSAKH HARIKUMAR

BTech AI & ML Undergraduate

+91 8075991113 • vysakh.harikumar.12@gmail.com • github.com/Vysakh-25

EDUCATION

BTech in Artificial Intelligence & Machine Learning	2024 – Present
94.8% in XIIth Mar Thoma Public School	2023 – 2024
95.4% in Xth Mar Thoma Public School	2021 – 2022

PROJECTS

Handwritten Whole Number Recognition System

AI-based handwritten digit recognition system using Python, TensorFlow, OpenCV, and Tkinter. Includes real-time drawing canvas, image preprocessing, digit prediction, and a custom feedback training pipeline for improving model accuracy.

Tech Stack: Python, TensorFlow, OpenCV, Tkinter

Hour Minute Converter

Interactive web-based time conversion tool with real-time synchronization between hour and minute inputs using JavaScript event handling and DOM manipulation.

Tech Stack: HTML, CSS, JavaScript

Guess The Number Game

Simple browser-based number guessing game demonstrating frontend interaction, user input handling, and basic game logic implementation.

Tech Stack: HTML, CSS, JavaScript

SKILLS

Programming: Python, C, Java

Tools / Libraries: Git, GitHub, TensorFlow, OpenCV

CERTIFICATIONS

- IoT Workshop — Conducted by College IOT Club
 - AI & Machine Learning with Python — Udemy
-

LEADERSHIP

School House Vice Captain

2022 – 2023

EXTRACURRICULAR

- Languages: English, Malayalam, Spanish
- Amateur drummer & guitarist
